PROFESSIONAL SUMMARY

Aspiring Data Scientist with strong foundations in Artificial Intelligence, Machine Learning, and Data Analytics. Experienced in developing predictive models, building interactive dashboards, and delivering data-driven insights. Passionate about applying data science techniques to solve real-world business problems and continuously learning through academic coursework, training programs, and freelance projects.

EDUCATION

Menoufia University – Faculty of Artificial Intelligence

Bachelor of Science in Data Science (2023 - 2027)

Expected Graduation: 2027

Relevant Coursework: Data Analytics, Data Science, Machine Learning, Computer Vision, Deep Learning, NLP, Reinforcement Learning, Artificial Intelligence, Statistics, Big Data

WORK EXPERIENCE

Data Scientist – Freelance Projects (Aug 2023 – Present)

- Developed a customer churn prediction model using Random Forest, Logistic Regression, and XGBoost, achieving 86% accuracy and identifying key churn drivers.
- Built automated Power BI dashboards to monitor KPIs such as retention rate, monthly recurring revenue, and customer lifetime value.
- Delivered data insights that improved marketing campaign ROI by 20% through audience segmentation and channel optimization.

Junior Data Analyst – Internship (Aug 2023 – Aug 2023)

- Cleaned and prepared large-scale transactional datasets (10k+ rows) using Python (Pandas) and SQL, handling missing values and outliers.

- Automated weekly Excel and Power BI reports, reducing manual analyst effort by 40%.
 - Performed EDA to uncover sales trends, supporting inventory and pricing decisions.
-

PROJECTS

Machine Learning Desktop Application

- Built an end-to-end ML desktop app using Python and CustomTkinter GUI.
- Integrated data preprocessing (scaling, encoding, handling missing values) and implemented regression (Linear, Ridge), classification (Logistic, Random Forest), and clustering (K-Means) algorithms.
- Automated evaluation metrics (RMSE, accuracy, silhouette score) and visualized results with Matplotlib/Seaborn.

Retail Sales Data Analytics Dashboard

- Cleaned and analyzed 50k+ retail transaction records using Power Query and DAX.
 - Designed an interactive Power BI dashboard tracking sales revenue, monthly growth %, customer retention, and top-selling products.
 - Helped optimize inventory planning, reducing stockouts by 15% and improving reporting efficiency by 70%.
-

TECHNICAL SKILLS

Programming: Python, SQL

Libraries: Pandas, NumPy, Scikit-learn, PyTorch, Matplotlib, Seaborn

Visualization Tools: Power BI, Excel

Databases: MySQL

Other: Git/GitHub, Data Cleaning, Feature Engineering, ETL

CERTIFICATIONS & AWARDS

- Certificate in Data Analytics – NTI (120 hrs, 2025)
- AI & ML Summer Code Camp – ITI (72 hrs, 2025)
- Dean's List, Menoufia University
